The board of Directors (the "Board") of China XLX Fertiliser Ltd. (the "Company" and, together with its subsidiaries, the "Group") is pleased to present this interim report for the six months ended 30 June 2020 ("1H2020").

(I) REVENUE

With the Novel Coronavirus ("COVID-19") pandemic generally under control in the PRC since April 2020 and the transportation for goods and cargo largely restored to normal, the Group's performance has correspondingly rebounded. The performance of the Group for the first half of 2020 was better than that for the 3 months ended 31 March 2020.

REVENUE

The unaudited consolidated revenue of the Group increased by approximately 3% from approximately RMB4,796 million for the half year ended 30 June 2019 ("1H2019") to approximately RMB4,940 million for 1H2020. The unaudited consolidated net profit of the Group decreased by approximately RMB53 million or 17% from approximately RMB317 million for 1H2019 to approximately RMB264 million for 1H2020. The unaudited total comprehensive income attributable to the owners of the parent decreased by approximately RMB72 million or 28% from approximately RMB252 million for 1H2019 to approximately RMB180 million for 1H2020.

UREA

Revenue derived from the sales of urea decreased by approximately RMB316 million or 17% from 1,886 million for 1H2019 to approximately RMB1,570 million for 1H2020. This was due mainly to the decrease in sales volume and the average selling price of urea products of the Group by approximately 5% and 12% year on year ("YoY") respectively. Sales volume of urea for 1H2020 was approximately 992,000 tons. Under the premise of maintaining full production of the urea production line, the Group actively adjusted products combination according to changing market demands, reducing the external sales of urea and thus increasing the production and the sales of compound fertilisers and urea solution for vehicle.

MELAMINE

Revenue derived from the sales of melamine decreased by approximately RMB51 million or 14% from RMB368 million for 1H2019 to approximately RMB317 million for 1H2020. The decrease was due mainly to a decrease in the average selling price of melamine by 15% YoY which was largely the result of the weakened demand in domestic chemical products and the negative impact from the outbreak of COVID-19.

FURFURYL ALCOHOL

Revenue derived from the sales of furfuryl alcohol products increased by approximately RMB26 million or 13% from approximately RMB201 million for 1H2019 to approximately RMB227 million for 1H2020. The increase in sales revenue was due mainly to the increase of sales volume of approximately 23% YoY to 26,626 tons for 1H2020, which was partially offset by a drop in average selling price of furfuryl alcohol products by approximately 8% YoY.

COMPOUND FERTILISERS

¥ m

Gross profit margin of compound fertilisers of the Group increased to approximately 17.4% in 1H2020 from approximately 14.9% in 1H2019. The increase was mainly due to the decrease in average cost of raw material, such as phosphate and potash fertilizers, by approximately 9% and the increase in the sales of high-efficient fertilisers.

METHANOL

Gross profit margin of methanol of the Group decreased to approximately negative 2.3% for 1H2020 from approximately 4.3% for 1H2019. This was due mainly to the weakened international energy prices which in turn caused the drop in the average selling price of methanol by approximately 35% and such drop was greater than the drop in the average production cost (purchase price of coal) of methanol.

DIMETHYL ETHER DME

Gross profit margin of DME of the Group decreased by approximately 4 percentage point to approximately 5.7% for 1H2020 from approximately 9.7% for 1H2019. This was a result of a larger decrease in the average selling price of DME of 15% as compared to a 12% decrease in the average production cost.

MELAMINE

Gross profit margin of melamine of the Group decreased by approximately 7 percentage points to approximately 30.9% for 1H2020 from approximately 37.8% for 1H2019. Under the context that the melamine producers in the PRC have generally recorded losses, the Group leveraged on its technology advantage and cost advantages and managed to maintain the gross profit margin of melamine products above 30%.

FURFURYL ALCOHOL

Gross profit margin of furfuryl alcohol products increased by approximately 6 percentage points from approximately 7.6% for 1H2019 to 13.1% for 1H2020. By leveraging on its scale advantages, implemented technological transformation and taking advantage of the reduction in the purchase cost of the main raw material (furfural), the Group reduced the cost of sales of furfuryl alcohol by approximately 13% YoY. The reduction was substantially greater than the drop in furfuryl alcohol selling price.

Other income increased by approximately RMB48 million or approximately 151% from approximately RMB32 million in 1H2019 to approximately RMB80 million in 1H2020. This was mainly due to the increase in profit on disposal of items of property, plant and

INCOME TAX EXPENSE

Income tax expense decreased by approximately RMB12 million or 18% from approximately RMB70 million in 1H2019 to RMB58 million in 1H2020 due to lower profits.

PROFIT FOR THE PERIOD

The profit for the period decreased by approximately RMB53 million or 17% from approximately RMB317 million in 1H2019 to approximately RMB264 million in 1H2020. This was mainly due to the decrease in gross profit and increase in selling and distribution expense of approximately RMB56 million and RMB49 million respectively. The decrease in profit for the period was partially offset by the increase in other income of approximately RMB48 million.

(V) ■

The domestic and international economic environment has become more complex and volatile recently. Not to mention the continued weakness of international energy prices and the impact of the COVID-19 epidemic. All of these have led to a reduction in the prices of the Group's major chemical products such as methanol, dimethyl ether and melamine. With the domestic epidemic generally under control and the arrival of the winter peak season for the sales of chemical products in the second half of the year, it is expected that the market demand for the Group's major chemical products will gradually recover.

The market integration in the domestic urea industry has been accelerating. The Group expects that the supply and demand of urea products will maintain a tight balance to provide support for domestic urea prices. At the same time, domestic land re-cultivation and land transfer policies are being implemented steadily, which is expected to further promote the modernization of China's agriculture industry. The shortage of food supply in some overseas regions and the increase in domestic food prices as a result of the epidemic will further stimulate the market's demand for high-efficient fertilisers. The Group will also take this opportunity to further advance its product differentiation strategy and strengthen the research and promotion of high-efficient fertilisers, thereby enhancing the Group's profitability and market competitiveness.

In terms of project construction, the Group's Xinxiang production plant relocation project and the Jiangxi base construction project are proceeding as scheduled. The Xinxiang production plant relocation project is expected to be completed and put into production in the third quarter, and the Jiangxi base construction project is expected to be completed and put into production in the fourth quarter. The Jiangxi base construction project is expected to be completed and put into production in the fourth quarter.

1. OPERATIONAL AND FINANCIAL RISKS

I MARKET RISK

The major market risks of the Group include changes in the average selling prices of key products, changes in the costs of raw materials (mainly coal) and fluctuations in interest and exchange rates.

II COMMODITY PRICE RISK

The Group is also exposed to commodity price risk arising from fluctuations in product sale prices and costs of raw materials.

III INTEREST RATE RISK

The major market interest rate risk that the Group is exposed to includes the Group's long-term debt obligations which are subject to floating interest rates.

IV FOREIGN EXCHANGE RISK

The Group's revenue and costs are primarily denominated in RMB. Some costs may be denominated in Hong Kong dollars, United States dollars or Singapore dollars.

V INFLATION AND CURRENCY RISK

According to the data released by the National Bureau of Statistics of China, the consumer price index of the PRC increased by 3.8% in the six months ended 30 June 2020 as compared to an increase of 2.2% in the same period in 2019. Such inflation in the PRC did not have a significant impact on the Group's operating results.

VI LIQUIDITY RISK

The Group monitors its risk exposure to shortage of funds. The Group considers the maturity of both its financial investments and financial assets (e.g. trade receivables and other financial assets) and projected cash flows from operations. The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank overdrafts and bank loans. As at 30 June 2020, approximately RMB3,740 million (31 December 2019: RMB2,774 million), or 45.51% (31 December 2019: 46%) of the Group's debts will mature in less than one year based on the carrying value of the borrowings reflected in the financial statements. Currently, the Group is adjusting the loan structures and obtained sufficient long term bank credit.

| Bills receivable | 224,270 | 245,413 |
| | 502,723 | 393,419 |

Trade receivables are non-interest-bearing and are normally settled on terms of 30 to 90 days. They are recognised at their original invoice amounts which represent their fair values on initial recognition. The Group's bills receivable are non-interest-bearing and are normally settled on terms of 90 to 180 days. Trade and bills receivables are denominated in RMB.

The Group's trading terms with its customers are mainly payment in advance or on credit for certain customers. Each customer has a maximum credit limit. The Group seeks to maintain strict control over its outstanding receivables and to minimise credit risk. Overdue balances are reviewed regularly by senior management. In view of the aforementioned and the fact that the Group's trade receivables relate to a large number of diversified customers, there is no significant concentration of credit risk. The Group does not hold any collateral or other credit enhancements over these balances.

| Cash and cash equivalents | 1,190,893 | 884,448 |

As at 30 June 2020, the cash and bank balances of the Group denominated in RMB amounted to RMB1,164,325,000 (31 December 2019: RMB863,666,000). The RMB is not freely convertible into other currencies, however, under Mainland China's Foreign Exchange Control Regulations and Administration of Settlement, Sale and Payment of Foreign Exchange Regulations, the Group is permitted to exchange RMB for other currencies through banks authorised to conduct foreign exchange business.

Cash at banks earns interest at floating rates based on daily bank deposit rates. Short-term time deposits are made for varying periods of between one day and three months depending on the immediate cash requirements of the Group, and earn interest at the respective short-term time deposit rates. The bank balances and pledged deposits are deposited with creditworthy banks with no recent history of default.
